

# Transitional Housing Options

Description	Pros	Cons	Modifications
<p>1. Treat Transitional Housing as we have in past rounds – where it will lose points for project type and meeting HUD priorities, means maximum TH program score = 84. Utilize the same performance criteria as in the 2013 and 2015 rounds</p>			
<p>2. Automatically place Transitional Housing in Tier 1 so it is not at risk while local funds are secured to support it as interim housing.</p>			
<p>3. Adjust the performance criteria by which TH is evaluated so that it too could score up to 100 points. Criteria could include length of stay (4 months or less); % of clients served directly from the streets; exits to PH; cost per PH exit; others...</p>			

Which approach do you favor and why?
