Every two years, during the last 10 days of January, communities across the country conduct comprehensive counts of the local homeless populations in order to measure the prevalence of homelessness in each local Continuum of Care.

The 2017 Alameda County Point-in-Time Count was a community-wide effort conducted on January 30, 2017. In the weeks following the street count, a survey was administered to 119 unsheltered and sheltered homeless individuals in Hayward, in order to profile their experience and characteristics.

### 2017 Homeless Census Population
