

CoC SCF Committee Office Hours

Overview of the HUD NOFO and CoC Funding Competition

January 30, 2025

Presenters

Jose Lucio

Matthieu Kaman

CoC Nuts and Bolts

Defining Continuum of Care or CoC

CoC Program: The US Department of **Housing and Urban Development (HUD)** program that provides funding to address homelessness. The HUD CoC Program funds activities such as Coordinated Entry, HMIS, Permanent Supportive Housing, and Rapid Rehousing

The Alameda County CoC: All service providers, government partners, stakeholders and community members working together in their shared commitment to ending homelessness in Alameda County

CoC Board: The Governing Body of the CoC. The Leadership Board fills this role in the Alameda county CoC

CoC Program Interim Rule

The Interim Rule sets the regulatory requirements for the implementation of the Continuum of Care (CoC) Program and CoC planning process

The Interim Rule sets HUD's requirements and expectations for the CoC Board and gives the Board the authority to carry out its functions

The interim rule requires communities to establish a Continuum of Care to receive CoC Program funding, because the community will need to be fully engaged to end homelessness

Why is a CoC Important

Develop proactive solutions rather than reactive stop-gaps

Coordinate targeted homeless resources and mainstream resources for a more efficient and effective system

Identify common goals for which to advocate

Provides a forum to increase community “buy-in” for the work of ending homelessness.

What Are the Key Elements of the CoC

CoC Board

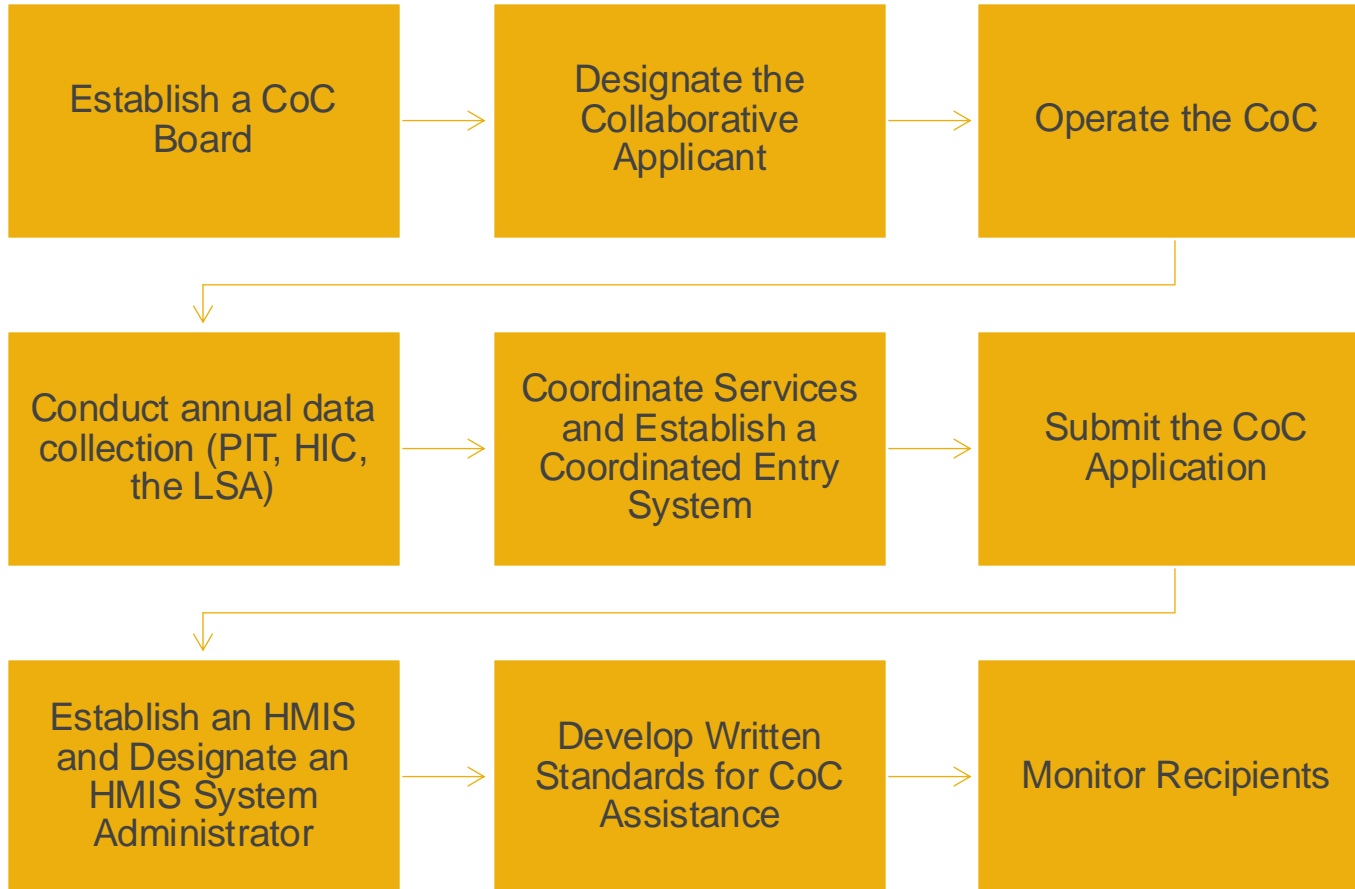

Collaborative
Applicant

HMIS

Coordinated
Entry System

CoC-funded
Projects and
Programs

What are the CoC's Key Functions

Using CoC Funding to Support the System of Care

What does the CoC Program Fund

Permanent Supportive Housing

Rapid Rehousing

Transitional Housing (Renewal only)

Joint Transitional-Rapid Rehousing

HMIS

Coordinated Entry

What The CoC Program Can't Fund

Emergency Shelter

Support Services Only without Housing (except Coordinated Entry)

New Transitional Housing (except combined with RRH)

Homelessness Prevention

NOFO/CoC Funding Competition

Grants Inventory Worksheet (GIW) and Project Funding Levels

The **G**rants **I**nventory **W**orksheet or **GIW**

Project Level: The GIW calculates the **Annual Renewal Amount** or **ARA** for each renewing project.

System Level: The GIW calculates the **Annual Renewal Demand** or **ARD**, which is the sum of all ARAs within the CoC.

The **G**rants **I**nventory **W**orksheet or **GIW** is the record of all grants in the CoC that is eligible for renewal in the upcoming CoC Program Competition

Where Can I Find the GIW?

CoC Grant Inventory Worksheet Reports

The [Continuum of Care \(CoC\) Grant Inventory Worksheet \(GIW\)](#) report is used to record all grants within a CoC's geographic area that are eligible for renewal funding in the upcoming CoC Program Competition. The GIW calculates an Annual Renewal Amount (ARA) for each project, which is the sum of each project's renewable budget line items (BLIs) (e.g., rental assistance, leasing, supportive services) and identifies the maximum renewal amount a renewal project applicant may apply for during the CoC Program Competition. The GIW report also calculates the CoC's Estimated Annual Renewal Demand (ARD), which is the sum of all ARAs within the CoC.

Continuum of Care (CoC) Collaborative Applicants must review their Grant Inventory Worksheet (GIW) report when distributed by HUD and, if needed, submit requests for corrections to HUD using the [GIW Change Form](#).

Collaborative Applicants are encouraged to review the [GIW Instructions for CoCs, Collaborative Applicants, and Project Applicants](#) before proceeding.

homelessness

Consolidated Application

Two-Part Selection Process

Part 1: Local Competition

- a. The CoC creates a local process
- b. Agencies submit local applications
- c. Local applications are “reviewed & ranked” by a scoring panel

Part 2: National Competition

- a. The CoC submits the Collaborative Application to HUD
- b. HUD decides what to fund
- c. **The CoC’s Priority Listing is key!**

HUD Requirements for Rating and Ranking Renewal Projects

Must include objective factors (minimum 33% of overall score)

Must include **S**ystem **P**erformance **M**easures or SPMs (minimum of 20% of overall score)

Must consider severity of barriers faced by project participants

Must assess how projects take steps to identify and address racial disparities and advance equity

HUD generally encourages CoCs to reallocate low performing projects (reduce their budgets and give funds to new projects)

System-Wide Database

HMIS

- **The Homeless Management Information System or HMIS** is the primary database used for reporting the number of people experiencing homelessness and other outcomes to HUD. An information system use
- Each Continuum of Care (CoC) is responsible for selecting an HMIS software solution that complies with [HUD's data collection, management, and reporting standards](#).
- Uses:
 - Collect, store, and share (across approved providers) client-level data to support the provision of housing and services to people at risk of or experiencing homelessness.
 - Coordination of services for clients.
 - Understand system-level provision of housing and services, and the demographics of those being served
 - Analysis of the system-level data can support assessments of system-wide needs and establishing funding priorities

System-Level Reporting

System Performance Measures (SPM)

HUD developed seven System Performance Measures (SPM) to help communities measure their performance as coordinated systems of care and to measure their progress toward the goal of ending homelessness.

CoCs are expected to use the SPMs to evaluate how well homeless services systems are functioning, where improvements are needed, and if they have deployed the right combination of strategies and resources.

- 1: Length of Time a Person Remains Homeless
- 2a: Returns to homelessness within 6-12 months (after exit to a permanent destination)
- 2b: Returns to homelessness within 2 years (after exit to a permanent destination)
- 3: Number of Homeless Persons
- 4: Employment and Income Growth of Persons in CoC Program-funded Projects
- 5: Number of Persons who Become Homeless for the First Time
- 6: Homelessness Prevention and Housing Placement of Persons Defined by Category 3 of HUD's Homeless Definition in CoC Program-funded Projects
 - 6a: Preventing Returns to Homelessness within 6 and 12 Months Among This Subset of Families and Youth
 - 6b: Preventing Returns to Homelessness within 24 Months Among This Subset of Families and Youth
 - 6c: Successful Housing Placement Among This Subset of Families and Youth
- 7a: Successful Placement from Street Outreach
- 7b: Successful Placement in or Retention of Permanent Housing

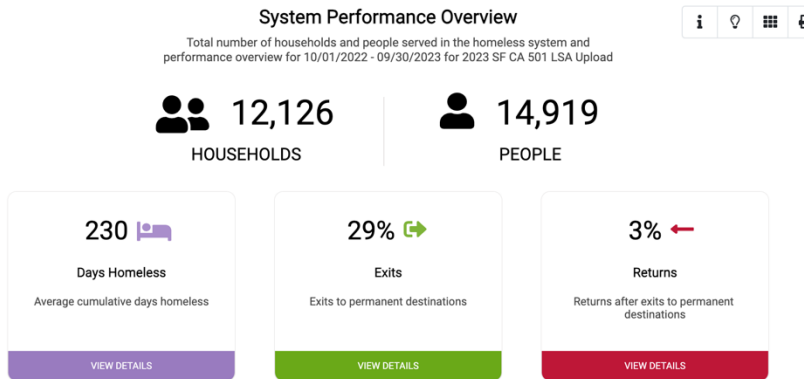

System-Level Reporting

Longitudinal Systems Analysis (LSA)

- The LSA is a report produced out of HMIS and submitted annually to HUD
- It provides critical information about how people experiencing homelessness use their system of care
- Information reported includes:
 - Number of individuals accessing the system
 - Number of people experiencing first time homelessness
 - Length of time homeless
 - All household exits
 - Demographics
 - Returns to homelessness
 - Yearly inflow / outflow
 - Pathways through the system

Reviewing System Level Data

Metric 1.1: Change in the average and median length of time persons are homeless in ES and SH projects.
Metric 1.2: Change in the average and median length of time persons are homeless in ES, SH, and TH projects.

a. This measure is of the client's entry, exit, and bed night dates strictly as entered in the HMIS system.

	Universe (Persons)		Average LOT Homeless (bed nights)			Median LOT Homeless (bed nights)		
	Submitted FY 2021	FY 2022	Submitted FY 2021	FY 2022	Difference	Submitted FY 2021	FY 2022	Difference
1.1 Persons in ES and SH	5961	7228	257	267	10	238	150	-88
1.2 Persons in ES, SH, and TH	6355	7758	275	279	4	248	167	-81

Point-in-Time Snapshots

Point-in-Time

Housing Inventory
Count

The Housing Inventory Count and the Point-in-Time Count provide a “point-in-time” or one day snapshot of the system: the HIC provides a snapshot of a CoC’s housing inventory while PIT provides a snapshot of the number of people experiencing homelessness in a CoC.

The Housing Inventory Count (HIC) is a point-in-time inventory of provider programs within a Continuum of Care that provide beds and units dedicated to serve people experiencing homelessness.

The Point-in-Time (PIT) count is a count of sheltered and unsheltered people experiencing homelessness on a single night in January.

Project Level Reporting

Annual Performance
Report (APR)

- The APR is a HUD required annual submission of aggregate project-level data that can be used to track provider-level activity over time. It is one of the primary sources of data used in the local competition for scoring.
- Currently, the APR includes information on:
 - Bed and unit inventory
 - Utilization
 - Data quality
 - Data timeliness
 - People/households served
 - Demographic info
 - Conditions/number of conditions
 - Living situation
 - Cash income
 - Non-cash benefits
 - Health insurance
 - Length of participation
 - Exit destinations
 - Veterans and youth specific info

Thank you!
